Request: Invoices for Tax Team - SharePoint site

Haaron,

Please setup a SharePoint site called "Invoices for Tax Team".

Here are the requirements

1. Emails forwarded from FixedAssets@ruizfoods.com to go to this site
2. Emails forwarded from AP@ruizfoods.com to go to this site
3. The emails are currently being forwarded to InvoicesforTaxTeam@ruizfoods.com
 - a. The history of emails from AP@ruizfoods.com and FixedAssets@ruizfoods.com are located in this mailbox.
4. The current challenge is the space allotted to a shared mailbox, we will run out of space soon
5. The members of the Tax Team and some IT will need access to this SharePoint site.
 - a. Members
 - i. Kyndra Byrd 020978 (for IT support)
 - ii. Shilpa Gudumasu 031673 (for IT support)
 - iii. Heather Boyle 031025
 - iv. Tammy Gong 017404
 - v. Tony Dai 02228
 - vi. William Stewart 029020
 - vii. Thomas Parker 030916
 - b. They will need a way to search that is as easy as searching in Outlook.
 - c. Read-Only access
 - d. The members must not be able to reply or forward any messages
5. The solution must not change the original mailboxes (FixedAssets and AP) messages from "Unread" to "Read"
- 6.

Cc : haarongconsult@ruizfoods.com

Dear Sal Gonzalez,
Category : Enterprise Applications
Sub Category: SharePoint

Hi Sal,

I wanted to share an update on the progress of the **Tax Team SharePoint solution and automation** for processing invoice emails.

Progress So Far:

- **SharePoint Communication Site Created** – Includes two dedicated document libraries: **Accounts Payable** and **Fixed Assets**.
- **Power Automate Flow Implemented** – The flow triggers when a new email arrives at **InvoicesforTaxTeam@ruizfoods.com**, extracting:
 - **Email Metadata:** From, To, Subject
 - **Email Body:** Saved as a .eml file in the corresponding document library
 - **Attachments:** Extracted and stored in the appropriate library with metadata applied
- **Search & Filtering Configured** – Libraries are indexed, and users can filter files by **From, To, Subject, and File Type** for an enhanced search experience.
- **Read-Only Permissions Configured** – Access permissions have been set up to ensure that only designated individuals can view content without making modifications.
- **Live Processing** – The solution is successfully capturing and storing new invoices as they arrive.

Ongoing Work & Next Steps:

- **Retrieving Historical Invoices** – We are currently working on extracting invoices from previous fiscal years. However, Power Automate has limitations on the number of past emails it can retrieve, and we are evaluating options to address this.
- **Optimization & Fine-Tuning** – Further improvements to automation, metadata handling, and permissions as needed.

The system is up and running, and we will provide updates on historical data extraction soon. Let me know if you have any questions or if you'd like a walkthrough of the current setup.

The site is: <https://ruizfoods.sharepoint.com/sites/InvoiceforTaxTeam>

Thanks,

Dear Sal Gonzalez,
Category : Enterprise Applications
Sub Category: SharePoint

Retrieve Historical Invoices Status Update

Dear Sal,

Following an extensive round of development, testing, and performance validation, I'm pleased to share that we've made significant progress in automating the recovery of invoice-related emails and attachments from the InvoicesforTaxTeam@ruizfoods.com mailbox.

Current Capabilities

We are now leveraging the **Microsoft Graph API** inside of a Power Automate Trigger Flow to efficiently query and retrieve **Outlook emails that contain attachments**, overcoming previous limitations in scale and filtering. Given the volume of data, our solution retrieves emails in manageable batches of 1,000 and dynamically filters based on:

- Presence of attachments
- Fiscal year, calculated from the email's received date

For each qualifying email:

- The email body is saved as a .eml file
- All attachments (such as PDF invoices) are extracted and saved into the same SharePoint folder
- Metadata including **Subject, From, To, Received Date, and Fiscal Year** is automatically captured
- Files are organized under **Accounts Payable** or **Fixed Assets**, as appropriate

Ongoing Work

The process is still actively retrieving historical emails and will continue to run until all data has been processed. We'll notify you once the full recovery is complete.

Please let me know if you'd like a quick walk-through of the SharePoint library structure or a preview of the extracted data.

Here the evidence:

Re: [Request ID :##87823##] : Request: Invoices for Tax Team - SharePoint site

To : salg@ruizfoods.com

Cc : haarongconsult@ruizfoods.com

Dear Sal Gonzalez,
Category : Enterprise Applications
Sub Category: SharePoint

After extensive development, configuration, and testing, the **Invoice Search Portal** is now in a solid and stable state, ready to be presented to stakeholders.

To deliver a fast and intuitive user experience, we've implemented the solution using **PnP Modern Search Web Parts**. These components allow users to easily search for invoices by **invoice number, vendor, or any relevant keyword**, and then refine the results using smart filters such as:

- **Fiscal Year**
- **Received Date**
- **File Type**

The portal is connected to the SharePoint document libraries where invoice-related emails and attachments are stored, and it dynamically surfaces both .eml files and extracted invoice documents.

This approach has significantly simplified how users can locate financial correspondence and related records, providing a modern, user-friendly interface tailored for efficiency.

We're now in a good position to **demo the portal to key stakeholders** and move forward with rollout planning.

Please let me know if you'd like to schedule a walkthrough session or receive early access for review.

Good day,

As part of our ongoing efforts to improve invoice management and reduce reliance on Outlook storage for the Tax Team, we have developed a new **Invoice Search Portal** within SharePoint.

This portal provides a more scalable and efficient way to search for invoice emails and attachments, and helps proactively address the risk of hitting storage limits on the Tax Team's mailbox.

At this stage, we would appreciate your help in **performing initial user testing** to validate that the portal meets everyday search and retrieval needs.

Specifically, you'll be able to:

- Search by **invoice number**, **vendor name**, or any keyword.
- Filter search results by **Fiscal Year**, **Received Date**, and **File Type**.

What we need from you:

- Perform a few simple search tasks using the portal.
- Provide quick feedback on your experience (search speed, ease of finding information, etc.).

Important Note:

Tony — if after your review you would like members of your team (William Stewart or Thomas Parker) to also test, please feel free to let me know, and we'll include them in the next round.

I'll be sending out access instructions and a simple guide once I receive your confirmation.

Please feel free to reply to this email if you have any questions ahead of time.

Thank you in advance for your time and support!

Invoice for Tax Team

Home Accounts Payable Fixed Assets Documents Pages Site contents Edit

Published 4/25/2025 Share Edit

Welcome to the Invoice Search Portal

This site has been designed to help you quickly find and access invoice-related emails and attachments from the InvoicesforTaxTeam@ruizfoods.com mailbox.

You can begin by using the search bar above — simply enter an **invoice number**, a **vendor name**, or any **keyword** that may appear in the subject, body, or attachment of an email.

Once your search results appear, you can easily **refine** the results using the filter panel on the left. You'll be able to narrow down by:

- Fiscal Year** — Automatically determined from the email's received date
- Received Date** — Filter by a specific timeframe
- File Type** — Quickly isolate PDFs, EMLs, Excel files, and more

This solution was built to streamline your access to financial correspondence and ensure you can retrieve the information you need — when you need it.

Description :
 Haaron,

Please setup a SharePoint site called "Invoices for Tax Team".

Here are the requirements

1. Emails forwarded from FixedAssets@ruizfoods.com to go to this site
2. Emails forwarded from AP@ruizfoods.com to go to this site
3. The emails are currently being forwarded to InvoicesforTaxTeam@ruizfoods.com
 - a. The history of emails from AP@ruizfoods.com and FixedAssets@ruizfoods.com are located in this mailbox.
4. The current challenge is the space allotted to a shared mailbox, we will run out of space soon
5. The members of the Tax Team and some IT will need access to this SharePoint site.
 - a. Members
 - i. Kyndra Byrd 020978 (for IT support)
 - ii. Shilpa Gudumasu 031673 (for IT support)
 - iii. Heather Boyle 031025
 - iv. Tammy Gong 017404
 - v. Tony Dai 02228
 - vi. William Stewart 029020
 - vii. Thomas Parker 030916
 - b. They will need a way to search that is as easy as searching in Outlook.

- c. Read-Only access
- d. The members must not be able to reply or forward any messages
- 5. The solution must not change the original mailboxes (FixedAssets and AP) messages from "Unread" to "Read"
- 6.

Invoice Search Portal – Quick Testing Guide

Welcome!

Thank you for participating in testing the new **Invoice Search Portal** for the Tax Team.

This portal is designed to make it easier and faster to find invoice emails and attachments, while helping us manage storage growth in the Outlook mailbox.

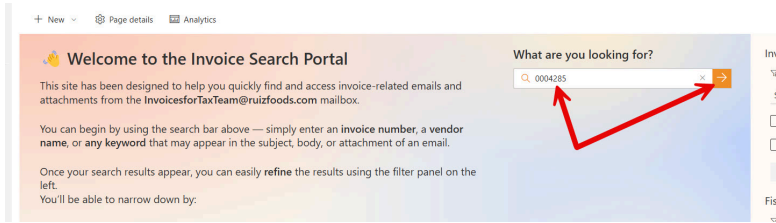

Please follow these simple steps to complete your testing:

✓ Step 1: Access the Portal

- Click the link provided to open the **Invoice Search Portal** in SharePoint. <https://ruizfoods.sharepoint.com/sites/InvoiceforTaxTeam>
- Make sure you are signed in with your **Ruiz Foods** account.

✓ Step 2: Perform Basic Searches

- In the **Search Bar**, try searching for:
 - An **Invoice Number** (e.g., "004285")
 - A **Vendor Name** (e.g., "Westrock")
 - A **Keyword** related to an invoice (e.g., order number "9866507")

✓ Step 3: Apply Filters

After search results appear, apply filters from the left-side panel:

- **Fiscal Year:** Select a fiscal year to see only invoices received in that period.
- **Received Date:** Narrow results by a specific time range.
- **File Type:** Choose to view only certain file types (PDFs, EMLs, etc.).

✓ Confirm that filtering updates the results correctly.

✓ Step 4: Open Documents

- Click a few results to open the attached invoice documents or emails.
- Confirm that attachments (like PDFs) open properly.

✓ Step 5: Provide Feedback

After completing the steps:

- Was the search experience clear and easy?
- Did filtering work as expected?
- Were you able to find what you searched for?

Please send any feedback (even small comments) to me directly.

RE: [Request ID :##87823##] : Request: Invoices for Tax Team - SharePoint site

To : itservicedesk@ruizfoods.com, kyndrab@ruizfoods.com, tammyg@ruizfoods.com, tonyd@ruizfoods.com

Cc : haarongconsult@ruizfoods.com, salg@ruizfoods.com

Team,

I performed a few searches and have my feedback below.

1. Some invoices were missing that are in DM currently, but I was not able to find them here.
 - a. Ex: Supplier #21337, Jackson Walker: Invoices 2010898 & 2026098
 - b. Ex: Searched supplier name Jackson Walker and no findings

- c. Ex: Entered supplier #21337 in the search and it pulled up results but not the invoices I was looking for. I received output files for disbursements primarily.
2. PDF's opened fine but I wasn't crazy about how it didn't default back to the home page to see my search (I clicked on the "x" in the top right corner to close the attachment I opened vs hitting the back arrow). It went back a FA listing for FY25. I had to select home to go back to where I was but I lost the invoice number or supplier number I was searching for. I did the same search again and hit the back arrow and it took me home, but I still lost my search criteria.
3. Emails opened fine
4. I was able to find some invoices but not all

Thanks,

Heather Boyle

Dear Sal Gonzalez,

Category : Enterprise Applications

Sub Category: SharePoint

Thanks Heather, this is good feedback. Will proceed with your examples and see what we can do to enhance the search discovery process. We assume that:

- 1) file names and email subjects have the Invoice number in it
- 2) SharePoint Search engine has the capability to find inside PDF files

Will then proceed to review your test cases and advise the outcome. Thanks

To : heatherb@ruizfoods.com,salg@ruizfoods.com

Cc : haarongconsult@ruizfoods.com

Hi Heather,

Thank you again for your detailed feedback on the Invoice Search Portal — I've taken time to replicate the test scenarios you described, and here's a summary of what I found:

Invoice Search Behavior

- **Invoice #2010898:**  Two results appear as expected.
- **Invoice #2026098:**  Currently returns no results — I'll investigate indexing and metadata to understand why it's not being surfaced.

(Screenshots attached for reference.)

Search by Supplier or Name

- **Jackson Walker:** The portal successfully retrieves 50 results due to the ability to search within PDF and email content. However, I agree that the wide match is noisy — it returns a lot of unrelated Jackson content, which may cause confusion.
 - **Supplier #21337:** Returns 21 results. That confirms it's searchable, though the relevance of the results needs to be fine-tuned.
-

Navigation Experience

- Confirmed: when a PDF is opened, the system navigates to the **library folder**, not back to the **search results page**. That can certainly break the flow and cause users to lose their context (like the search keyword or filters).

I'll look into options to:

- Keep the user anchored in the search experience after viewing a file
 - Improve how filters and targeted searches work to minimize overwhelming results
-

Next Steps

- I'll evaluate adding stronger filters or metadata-based refinement to help narrow down results more precisely (e.g., by invoice number, supplier ID, or document category).
- I'll explore if we can enforce better return-to-search behavior after opening a file.
- I'll check indexing for the missing invoice and ensure it's picked up correctly in future crawls.

Thank you again for your time and clear observations — it really helps us shape the solution to better serve your team.

Best regards,

To : heatherb@ruizfoods.com,itservicedesk@ruizfoods.com,salg@ruizfoods.com

Good morning, reflection on the next action items turns out that the behavior of returning back to the library after previewing a document is a default behavior and that may confuse our end users. So a workaround solution will be to open the preview file in another tab so you never lose the results page. Essentially when you search and click a result, that result will be open in another tab in the internet browser. Then you just close the tab and again will get back to the search results page.

How that sound? Did I explained myself?

Thanks

Since now and always, thanks!

Subject: RE: [Request ID :##87823##] : Request: Invoices for Tax Team - SharePoint site

Good morning, reflection on the next action items turns out that the behavior of returning back to the library after previewing a document is a default behavior and that may confuse our end users. So a workaround solution will be to open the preview file in another tab so you never loose the results page. Essentially when you search and click a result, that result will be open in another tab in the internet browser. Then you just close the tab and again will get back to the search results page.

How that sound? Did I explained myself?

Thanks

Since now and always, thanks!

Subject: Re: [Request ID :##87823##] : Request: Invoices for Tax Team - SharePoint site

Hi Heather,

Thank you again for your detailed feedback on the Invoice Search Portal – I've taken time to replicate the test scenarios you described, and here's a summary of what I found:

Invoice Search Behavior

- **Invoice #2010898:**  Two results appear as expected.

- **Invoice #2026098:** ✗ Currently returns no results — I'll investigate indexing and metadata to understand why it's not being surfaced.

(Screenshots attached for reference.)

Search by Supplier or Name

- **Jackson Walker:** The portal successfully retrieves 50 results due to the ability to search within PDF and email content. However, I agree that the wide match is noisy — it returns a lot of unrelated Jackson content, which may cause confusion.
- **Supplier #21337:** Returns 21 results. That confirms it's searchable, though the relevance of the results needs to be fine-tuned.

Navigation Experience

- Confirmed: when a PDF is opened, the system navigates to the **library folder**, not back to the **search results page**. That can certainly break the flow and cause users to lose their context (like the search keyword or filters).

I'll look into options to:

- Keep the user anchored in the search experience after viewing a file
- Improve how filters and targeted searches work to minimize overwhelming results

Next Steps

- I'll evaluate adding stronger filters or metadata-based refinement to help narrow down results more precisely (e.g., by invoice number, supplier ID, or document category).
- I'll explore if we can enforce better return-to-search behavior after opening a file.
- I'll check indexing for the missing invoice and ensure it's picked up correctly in future crawls.

Thank you again for your time and clear observations — it really helps us shape the solution to better serve your team.

Best regards,
Haaron Gonzalez

Description :
Haaron,

Please setup a SharePoint site called "Invoices for Tax Team".

Here are the requirements

1. Emails forwarded from FixedAssets@ruizfoods.com to go to this site
2. Emails forwarded from AP@ruizfoods.com to go to this site
3. The emails are currently being forwarded to InvoicesforTaxTeam@ruizfoods.com
 - a. The history of emails from AP@ruizfoods.com and FixedAssets@ruizfoods.com are located in this mailbox.
4. The current challenge is the space allotted to a shared mailbox, we will run out of space soon
5. The members of the Tax Team and some IT will need access to this SharePoint site.
 - a. Members
 - i. Kyndra Byrd 020978 (for IT support)
 - ii. Shilpa Gudumasu 031673 (for IT support)
 - iii. Heather Boyle 031025
 - iv. Tammy Gong 017404
 - v. Tony Dai 02228
 - vi. William Stewart 029020
 - vii. Thomas Parker 030916
 - b. They will need a way to search that is as easy as searching in Outlook.
 - c. Read-Only access
 - d. The members must not be able to reply or forward any messages
6. The solution must not change the original mailboxes (FixedAssets and AP) messages from "Unread" to "Read"
- 7.

Dear Heather,

Category : Enterprise Applications

Sub Category: SharePoint

Good day, I have been working on what we discussed earlier. Please see the progress, essentially:

- 1) I added a preview capability in the search results section
- 2) when you click the title in a search results card, it opens the file in another tab

I will continue research ways to be more effective with the index and search results. Also, I will research why the second invoice number was not found, perhaps there is an error in the process that takes out a new invoice from the email address.

Hi Sal,

Following Heather’s feedback and further review of our current search experience, I wanted to bring forward a potential enhancement opportunity. While our current portal supports searching by invoice number and file name, it's becoming clear that the **Tax and AP teams need a deeper level of granularity** — such as the ability to search by **supplier number, supplier name, amounts, or dates**.

Searching these values inside PDFs or email subjects only gets us part of the way there. To address this gap, I explored Power Automate’s **AI Builder** capabilities and found a solution designed for this need.

What I’m Proposing

Use the **AI Builder – Invoice Processing** model to:

- 1. Automatically process incoming PDF invoices.
- 2. Extract structured data such as supplier, invoice date, total, and line items.
- 3. Save the data to a SharePoint list, linked back to the original document.
- 4. Enable search and filtering by precise invoice attributes — not just keywords.

This would allow us to offer an experience aligned with how the teams actually retrieve financial data.

Here’s a short demo of the capability:

 [Watch Demo Video](#)

Licensing & Cost Estimate

AI Builder is a **premium feature**, available under two models:

1. Flat Rate Plan

- \$500/month (includes 1 million service credits)

2. Pay-As-You-Go (Azure-linked)

- \$0.005 per credit
- Each invoice (2 pages) consumes ~10 credits

Below is an estimate based on different monthly volumes:

Invoices/Month	Credits Used	Pay-As-You-Go Cost	Flat Monthly Cost
500	5,000	\$25.00	\$500
1,000	10,000	\$50.00	\$500
2,500	25,000	\$125.00	\$500
5,000	50,000	\$250.00	\$500
10,000	100,000	\$500.00	\$500

As you can see, the **pay-as-you-go model is ideal for lower volume or phased adoption**, while the **flat plan becomes cost-effective at scale**.

Business Value

- Enables richer search by supplier, amounts, and dates
- Reduces noise from keyword-based PDF search
- Scales better as the invoice archive grows

- Future-proofs how the team manages and retrieves financial records
- We can use these premium capabilities in additional Ruiz Foods scenarios

Let me know if you'd like to explore this further .

Best regards,

Haaron Gonzalez
