

Introducing the New Standardized Folder Structure for CEP Projects

Paulo Camargos
Operational Excellence Manager

Over time, our Engineering team has organized project documentation in many different ways — each approach reflecting the evolving state of our projects and practices. Now, as part of our ongoing **modernization effort**, we are introducing a **new standardized folder structure** for all CEP (Capital Expenditure Projects) at Ruiz Foods.

This new structure builds on years of hands-on experience delivering **mission-critical engineering projects** for the **food service industry**.

It represents not only a consolidation of best practices but also a **technological leap forward**, deeply integrated with SharePoint to simplify **collaboration, document discovery, knowledge sharing, and reusability**.

⚙️ A Smarter Way to Organize Projects

Each CEP Project now resides in a **dedicated document library** preconfigured with a set of **Document Sets (the familiar blue folders)**.

These Document Sets enforce **default metadata** and maintain a consistent folder hierarchy across all projects — ensuring that every file is tagged, searchable, and aligned with our company standards.

By **dragging and dropping documents into the right blue folder**, the required metadata is applied automatically, allowing our **search** to accurately identify, index, and classify each document.

🔍 Enhanced Search and Discovery

The Engineering Hub now includes a **modern search experience** that goes beyond filenames:

- You can search **within documents** by **keywords, technical terms, or process data**.
- Metadata filters allow you to refine results by **Location, Area, EAM Asset #, CEP Project #, Legal Entity, or Document Classification**.
- The **Document Classification tag** is directly mapped to the standardized folder hierarchy shown below — creating a powerful link between organization and search intelligence.

This means faster access to drawings, reports, and specifications — without needing to remember where they were stored.

💡 Key Features of the Engineering Hub

- **Dedicated Libraries per Project:**
Each CEP Project is its own SharePoint library with a built-in project structure and metadata model.

- **Document Sets (Blue Folders):**
Automatically apply metadata such as Facility, Legal Entity, Document Type, and CEP Project #.

CEP 00-000 TX1 New Project Quick Example

Cost and Procurement

Name	Modified	Modified By	
Cost Control Table	5 days ago	O365-PA-FLOWSVC	
Change Orders	5 days ago	O365-PA-FLOWSVC	
Requisitions	5 days ago	O365-PA-FLOWSVC	
Purchase Orders	5 days ago	O365-PA-FLOWSVC	
Invoices	5 days ago	O365-PA-FLOWSVC	
Contracts and Agreements	5 days ago	O365-PA-FLOWSVC	
Bids and RFPs	5 days ago	O365-PA-FLOWSVC	
CEP	5 days ago	O365-PA-FLOWSVC	
Vendors and Suppliers	5 days ago	O365-PA-FLOWSVC	

- Powerful Search Engine:**
Search across all project libraries by keyword or metadata filters for faster and more accurate results.

Search Engineering Documents

Freezer

- **Offline Sync Support:**
Every project library can be synced locally for offline access using OneDrive — keeping you productive even in remote environme

- **Standardization and Scalability:**
The structure is designed to scale across plants, teams, and project sizes, ensuring consistency everywhere.

Engineering Project Folder Structure

Project Lifecycle

- Charter – Project objectives and authorization.

- Scope Docs – Defines scope and deliverables.
- Preliminary Studies – Feasibility and risk assessments.
- Schedule – Timelines, milestones, and Gantt charts.
- Start Up – Commissioning and start-up documentation.
- Permits – Regulatory permits and approvals.
- Photos and Videos – Visual documentation of progress.
- Process Flow Diagrams – Process schematics and P&IDs.
- Drawings – Design, shop, and as-built drawings.
- Submittals – Product data and approval documentation.
- O&M Manuals – Operations and maintenance instructions.
- Warranties – Warranty documents for equipment and systems.
- Reports – Technical and status reports.
- Meetings and Presentations – Agendas, minutes, and decks.
- Communications – RFIs, correspondence, and memos.
- CQV – Commissioning, qualification, and validation records.
- Factory Acceptance Tests – FAT protocols and results.
- Training – Training materials and attendance.
- Lessons Learned – Post-project insights and improvements.

Cost and Procurement

- Cost Control Table – Budget tracking.
- Change Orders – Approved cost and scope changes.
- Requisitions – Requests for materials and services.
- Purchase Orders – Issued purchase orders.
- Invoices – Vendor and contractor invoices.
- Contracts and Agreements – Executed contracts and terms.
- Bids and RFPs – Bid documents, scoring, quotes.
- CEP – Capital expenditure proposals.
- Vendors and Suppliers – All vendor and supplier related documents.

Compliance and QA

- Safety – Safety plans and incident reports.
- Sanitation – Cleaning and sanitation records.
- QA and Food Safety Topics – QA inspections and protocols.
- Specifications and Standards – Technical and regulatory standards.
- COI – Certificates of insurance.

People and Stakeholders

- Organization and Roles – Org charts and assignments.
- Steering Committee and Board Presentations – Executive reporting.

Assets and Operations

- Assets and Nameplates – Equipment records.
- Spare Parts Quotes – Quotes for spare parts.
- Operations and IT Integration – IT and operations documentation.
- Software – Software licenses and configurations.

Moving Forward

This modernization marks another milestone in our **Engineering Digital Transformation** journey.

By unifying how we organize, tag, and search project documentation, we're improving collaboration and building a stronger knowledge for future projects.

Let's continue to work smarter together — one project at a time.

 Coming Soon:

Training sessions and quick-reference guides will be available directly on the **Engineering Hub** to help teams fully leverage this new structure. If you have questions or need support, please contact the **Engineering Hub Administration Team**.
